

The Easiest Way to Office 365

SkyKick is a new kind of migration application that makes it fast, safe, & easy to migrate businesses to Office 365.

Moving the Business and the Bits

Moving a business to Office 365 is no small task. Migration projects can be tedious and time-consuming, requiring significant planning, project management, and technical expertise. SkyKick is a new type of migration application that manages all the details of a move from start to finish. The result? Reduced time and risk. A seamless migration project. Happy customers.

SkyKick Application Suite Overview:

Mailbox discovery, configuration, licensing.

It's time consuming and costly to gather the information required to complete an SOW and develop the migration plan. SkyKick's Web Planner is a fast, easy-to-use sales assessment, planning, and configuration application that streamlines the process for you and your customers. The Web Planner discovers the customer's email mailboxes, simplifies licensing, and creates a personalized project plan to ready the customer for a seamless move to Office 365.

Assess, sell, plan – all in one step

No migration or Office 365 experience required

Quick & easy – less back and forth with client

No on-site visits required

Product Features

- Email Assessment
- Mailbox Discovery
- Fancy Mode
- Office 365 Licensing

Data and DNS. Automated everything.

After the plan has been submitted, Migration Sync orchestrates the entire migration project, keeping all the pieces of the migration in sync. First, the application pre-syncs all your customer's data to virtually eliminate data migration risk. Then DNS Sync goes to work to make the required email DNS changes to ensure a zero-downtime switch. Finally, Account Sync copies all your customer's account and user data to ensure a safe and efficient transition.

Fully automated

Zero downtime

Fast migration time (hello weekend!)

Lower risk

Product Features

- Server Sync
- DNS Sync
- Account User Provisioning
- Automated Communications

Setup, local migration, and more.

And last, but not least, the Outlook Assistant addresses many of the last-mile challenges that make or break the overall migration experience. OA is a lightweight client app that works with Migration Sync to finalize the migration. It automatically sets up Outlook and retains extras like Address Autocomplete and Email Signatures. It also performs local PST migrations and checks the network to ensure timely transfer of all the company's email data.

Easiest transition for employees

No more desktop to desktop

Enables easy POP3/IMAP migrations

Autopatches Outlook

Product Features

- Office 365 Setup
- Outlook Extras
- Local PST Migration
- Network Optimization

"We started with SkyKick just a short time ago, and have utilized the solution for every Office 365 migration we have done since. The value is incredible." – Jamison West, Arterian, Founder / CEO

Why Choose Data-Only?

High Quality

- ✓ Server Sync™ technology ensures comprehensive data migration before, during and after the MX record flip
- ✓ Basics - Emails, calendar, contacts
- ✓ Permissions - Mailbox, calendar, and public folder permissions
- ✓ Calendar Fidelity - Calendar meeting invite and status integrity
- ✓ Email Integrity - Email Flags, categories, folders

Easy Setup

- ✓ Powerful email discovery and mailbox Auto-Match simplifies source and destination setup
- ✓ Sync with source-side impersonation or password upload
- ✓ 6-clicks from start to finish
- ✓ 100% web-based

Less Effort

- ✓ Server Sync automates the data migration, which means no more managing "migration passes" and other migration busy work
- ✓ Self-healing technology adapts to server health to reduce errors and issues from unhealthy source servers
- ✓ Server Throttling gives partners ultimate control and ease
- ✓ Lightning fast technology reduces overall migration times

Less Risk

- ✓ Server Sync allows you to move all the data before the cutover, reducing your project risk
- ✓ Our technology is architected to ensure high levels of security
- ✓ Server Throttling reduces impact on the source server and network
- ✓ Server Sync is designed to avoid Office 365 throttling - improved speeds mean less risk
- ✓ Data is encrypted and migrated via TLS or RPC over HTTP as available
- ✓ Point-to-point replication means your data is never stored on SkyKick servers

A Product for Every Need

SkyKick offers three migration products designed to fit unique customer environments and the diverse needs of partners.

"Our company has standardized on SkyKick's Migration Suites. They are incredibly powerful and deliver the most value for our business. But occasionally, we do find customers who only need their email data moved, and so we're excited to also have SkyKick's Data-Only application to make that work fast, easy, and highly accurate." – Chris Oakman, VP / Chief
